#### INTERNSHIP

## **Emertxe Information Technologies**

IOT Based Home Automation Solution using Blynk App

# CODE | DEMONSTRATION

Nov 2022

#### Software used:

- Arduino IDE: IDE used to code the project
- PICSIMLAB Simulator: Simulator for Arduino Board
- Com()Com Serial : Used to connect Arduino Board with IDE

#### Project Details:

- Made an Air Conditioner which measures and displays temperature on a Dashboard. Can be paired and controlled by our mobile devices using Blynk IOT app.
- Made a serial tank which loads and discharges water when given instructions. It automatically stop loading as soon as it reaches its full capacity or when the tank is empty. Also controlled by Blynk IOT app.

#### **PROJECTS**

### DUEL IT OUT

CODE

#### Software used:

• Pygame

#### **Project** Details:

• A duel game using **pygame**, with multiple characters, sound and integrated main menu for better visuals.

### **ACHIEVEMENTS**

# JP MORGAN CHASE AND CO. SOFTWARE ENGINEERING VIRTUAL **EXPERIENCE PARTICIPANT**

2022

2022

Frameworks and software knowledge acquired: GIT, PYTHON, NODE.JS and TYPESCRIPT

# ACCENTURE DEVELOPER PROGRAM VIRTUAL EXPERIENCE **PARTICIPANT**

Got to experience the domains of ACCENTURE, i.e. Architecture, Software Engineering, Testing, Security and Artificial Intelligence
